SiyaBusa ERP - Administrator Setup Guide

ADMINISTRATOR GUIDE

Comprehensive setup guide for system administrators to configure SiyaBusa ERP for their organization.

Complete Guide for System Administrators

Overview

This guide helps administrators set up SiyaBusa ERP for their organization. Follow these steps in order for the best results.

Estimated Time: 2-4 hours for initial setup

Prerequisites

Before starting, ensure you have:

- Administrator login credentials
 - Company registration details (name, registration number)
 - Tax information (VAT number, PAYE reference)
 - Banking details for payment processing
 - List of users to be added
 - Company logo (PNG or JPG, min 200×200px)
-

Phase 1: Company Profile Setup

Step 1.1: Access Admin Settings

1. Log in with your administrator account
2. Click **Settings** (gear icon) in the side menu
3. Select **Company Settings**

Step 1.2: Basic Company Information

Complete all fields:

Field	Description	Example
Company Name	Legal registered name	ABC Trading (Pty) Ltd
Trading As	Trading name if different	ABC Solutions
Registration Number	CIPC registration	2020/123456/07
VAT Number	If VAT registered	4123456789
Physical Address	Street address	123 Main Street, Sandton
Postal Address	Postal address	PO Box 123, Sandton, 2196
Phone	Main contact number	+27 11 123 4567
Email	General company email	info@company.co.za
Website	Company website	www.company.co.za

Step 1.3: Upload Company Logo

1. Click **Upload Logo**
2. Select your logo file (PNG or JPG)
3. Crop if necessary
4. Click **Save**

Your logo will appear on:

- Login screen
- Dashboard header
- All printed documents (invoices, reports)
- Email communications

Step 1.4: Financial Year Settings

Configure your financial year:

Setting	Options	Notes
Year End Month	January - December	Most SA companies: February
Year End Day	1-31	Usually last day of month
First Period	Date	Start of current financial year

Phase 2: Tax & Compliance Setup

Step 2.1: SARS Configuration

Navigate to **Settings** → **Tax Configuration**

Field	Description
Tax Type	VAT / Non-VAT
VAT Registration	Your VAT number
Tax Rate	15% (current SA rate)
Filing Frequency	Monthly / Bi-monthly
eFiling Username	For SARS integration

Step 2.2: PAYE Setup (if applicable)

Field	Description
PAYE Reference	SARS employer reference
SDL Number	Skills Development Levy
UIF Reference	Unemployment Insurance
COIDA Number	Compensation for injuries

Step 2.3: Industry-Specific Compliance

Enable relevant modules:

- **Healthcare** - HPCSA compliance

- **Mining** - DMRE requirements
- **Construction** - CIDB integration
- **Financial Services** - FICA compliance

Phase 3: User Management

Step 3.1: Understanding Roles

SiyaBusa uses role-based access control:

Role	Access Level	Typical Users
Administrator	Full system access	IT Admin, Owner
Manager	Module + reporting	Department heads
Standard User	Assigned modules only	Staff
Read-Only	View only	Auditors
Custom	Defined permissions	Specific needs

Step 3.2: Creating User Accounts

1. Go to **Settings** → **User Management**
2. Click **+ Add User**
3. Complete the form:

Field	Required	Description
Email	Yes	User's work email
First Name	Yes	Legal first name
Last Name	Yes	Legal surname
Role	Yes	Select from dropdown
Department	No	For organization
Manager	No	For approval workflows
Phone	No	For notifications

4. Click **Create User**
5. User receives welcome email with login link

Step 3.3: Bulk User Import

For many users, use CSV import:

1. Download the template: **User Management** → **Import** → **Download Template**
2. Fill in user details in Excel
3. Save as CSV
4. Upload: **User Management** → **Import** → **Upload CSV**
5. Review and confirm

Step 3.4: Setting Permissions

For each user or role:

1. Select the user/role
2. Click **Permissions**
3. Enable/disable modules:

Dashboard	View	Edit	Delete	Admin
Financial	View	Edit	Delete	Admin
HR & Payroll	(no access)			
Inventory	View	Edit	Delete	Admin

Phase 4: Module Configuration

Step 4.1: Chart of Accounts

Navigate to **Financial** → **Setup** → **Chart of Accounts**

Option A: Use SA Template

1. Click **Load Template**
2. Select **South African Standard**
3. Review accounts
4. Click **Apply**

Option B: Custom Setup

1. Click **+ Add Account**
2. Define account structure
3. Repeat for all accounts

Step 4.2: Bank Account Setup

1. Go to **Financial → Setup → Bank Accounts**
2. Click **+ Add Bank Account**
3. Enter details:

Field	Example
Bank Name	First National Bank
Account Name	ABC Trading Main Account
Account Number	62123456789
Branch Code	250655
Account Type	Current Account
Currency	ZAR

Step 4.3: Tax Codes

Set up your tax codes:

Code	Description	Rate	Type
VAT	Standard Rate VAT	15%	Output
VAT-I	VAT Input	15%	Input
ZERO	Zero Rated	0%	Exempt
EXEMPT	VAT Exempt	0%	Exempt

Step 4.4: Numbering Sequences

Configure document numbering:

Document	Prefix	Starting Number	Example
Invoice	INV-	1001	INV-1001
Quote	QT-	1001	QT-1001
Purchase Order	PO-	1001	PO-1001
Payment	PAY-	1001	PAY-1001

Phase 5: Workflow Configuration

Step 5.1: Approval Workflows

Set up approval chains:

Example: Purchase Order Approval

Amount Range	Approver
R0 - R5,000	Team Lead
R5,001 - R25,000	Department Manager
R25,001 - R100,000	Finance Director
R100,001+	CEO

Step 5.2: Notification Rules

Configure who gets notified:

Event	Notify	Method
New approval request	Approver	Email + In-app
Approval complete	Requester	Email
Rejection	Requester	Email + In-app
Overdue approval	Approver + Manager	Email

Phase 6: Integration Setup

Step 6.1: Email Configuration

For sending emails from SiyaBusa:

Setting	Value
From Name	ABC Trading
From Email	erp@company.co.za
Reply To	support@company.co.za

Step 6.2: Payment Gateway (Optional)

For online payments:

1. Go to **Settings** → **Integrations** → **Payment Gateway**
2. Select provider (PayGate, PayFast, etc.)
3. Enter API credentials
4. Test with sandbox mode
5. Go live

Step 6.3: SARS eFiling Integration

For SARS submission:

1. Go to **Settings** → **Integrations** → **SARS**
 2. Enter eFiling credentials
 3. Test connection
 4. Enable auto-submission (optional)
-

Phase 7: Data Migration

Step 7.1: Opening Balances

Enter opening balances for:

- Bank accounts

- Customer balances (AR)
- Supplier balances (AP)
- Inventory quantities
- Asset register
- General ledger accounts

Step 7.2: Master Data Import

Import existing data:

Data Type	Format	Template
Customers	CSV	Download template
Suppliers	CSV	Download template
Products	CSV	Download template
Employees	CSV	Download template

Step 7.3: Historical Transactions (Optional)

Decide whether to import:

- Current year transactions only
- Last 2-3 years for reporting
- Just opening balances

Phase 8: Go-Live Checklist

Pre-Go-Live

All users created and tested login
 Chart of accounts reviewed and approved
 Opening balances entered and balanced
 Bank accounts linked
 Tax configuration verified
 Document templates customized
 Approval workflows tested
 Email sending tested

At least one test transaction per module
Backup strategy confirmed

Go-Live Day

Communicate go-live to all users
Support team on standby
Monitor system performance
Collect and address user issues
End-of-day reconciliation

Post-Go-Live (Week 1)

Daily check-ins with key users
Review and resolve logged issues
Fine-tune permissions
Adjust workflows if needed
Schedule first training refresher

Maintenance Tasks

Daily

- Review failed job notifications
- Check system alerts

Weekly

- Review user access requests
- Check disk/storage usage
- Review error logs

Monthly

- Deactivate unused accounts
- Review permission changes
- Update documentation
- Security audit

Annually

- Full access review
 - Archive old data
 - Update compliance settings
 - Renew integrations/certificates
-
