SiyaBusa ERP - Sales Playbook

SALES TEAM RESOURCE

Complete sales playbook including value propositions, objection handling, pricing guidelines, and competitive positioning.

The Complete Guide for Sales Success

Our Value Proposition

The One-Liner

"Enterprise-grade ERP with world-class features at 40-50% less than competitors."

The Elevator Pitch (30 seconds)

"SiyaBusa is a complete ERP system built specifically for South African businesses. We have everything SAP and Sage offer—financial management, HR, inventory, manufacturing, compliance—but at a fraction of the price. Plus, we're the only ERP with built-in SARS integration and audit preparation. Companies typically save R200,000+ per year switching to us."

The Full Story (2 minutes)

"Most South African businesses face a tough choice: expensive enterprise systems like SAP that cost millions, or basic accounting packages that can't scale."

SiyaBusa bridges that gap. We built a world-class ERP from the ground up, with 25+ integrated modules, AI-powered features, and deep South African compliance built in."

Our SARS Sentinel module automatically tracks SARS correspondence, calculates response deadlines, and prepares submissions. Our Audit Shield keeps you audit-ready year-round. No other ERP has these features."

We price per user, not per module. A 20-user company gets everything—financials, HR, inventory, manufacturing, compliance—for around R25,000 per month. That's 40-50% less than comparable solutions, with more features included.

We're already serving businesses in manufacturing, professional services, and construction. I'd love to show you a demo and discuss how we can help [company name]."

Understanding Our Customers

Ideal Customer Profile (ICP)

Attribute	Ideal	Good Fit	Not a Fit
Employees	20-200	10-500	<5 or >1,000
Revenue	R20M-R500M	R5M-R1B	<R5M
Current System	Spreadsheets, Pastel	Basic accounting	SAP, Oracle
Decision Timeline	<3 months	<6 months	>12 months
Budget Authority	Yes	Can influence	None

Key Industries

Industry	Why They Buy	Key Modules
Manufacturing	Production tracking, BOM, costing	Manufacturing, Inventory, Financial
Professional Services	Time billing, project management	Practice Management, Financial
Construction	Project costing, progress billing	Construction, Project, Financial
Healthcare	Patient management, medical inventory	Healthcare, Inventory, Compliance
Wholesale/Distribution	Inventory, multi-warehouse	Inventory, Warehouse, Sales
Property Management	Lease management, tenant billing	Property, Financial, CRM

Key Differentiators

What Makes Us Different

Feature	SiyaBusa	SAP	Sage	Xero
Price (20 users)	R25K/mo	R150K+/mo	R40K+/mo	R15K/mo
SARS Integration	Built-in	Custom dev	Basic	None
Audit Preparation	Audit Shield	None	None	None
AI Assistants	9 included	Extra cost	None	Basic
SA Compliance	Native	Localized	Good	Basic
Implementation	2-4 weeks	6-12 months	2-3 months	1 week
Manufacturing	Included	Included	Extra	None
Multi-Entity	Included	Extra	Extra	Extra

Our Unique Features

1. SARS Sentinel (No competitor has this)

- Tracks all SARS correspondence
- Calculates response deadlines automatically
- AI-powered document classification
- eFiling integration

2. Audit Shield (No competitor has this)

- Pre-built audit checklists (VAT, PAYE, IFRS)
- Permanent audit file management
- Evidence collection and linking
- Auditor portal for external access

3. SA-First Design

- PAYE/UIF/SDL calculations built-in
- B-BBEE scorecard tracking
- EEA reporting

- King IV governance support

4. All-Inclusive Pricing

- No module fees
 - No per-transaction fees
 - Training included
 - Support included
-

Sales Process

Stage 1: Discovery (30 minutes)

Goals:

- Understand current pain points
- Qualify budget and timeline
- Identify decision makers

Key Questions:

About Their Current Situation:

- "What system are you using today?"
- "What's working well? What's frustrating?"
- "How much time do you spend on month-end?"
- "How do you handle SARS correspondence?"

About Their Goals:

- "What would success look like in 12 months?"
- "What triggered you to look at new systems now?"
- "What's the cost of not solving this problem?"

About Decision Process:

- "Who else is involved in this decision?"
 - "What's your timeline for making a change?"
 - "What budget range are you working with?"
-

Stage 2: Demo (60 minutes)

Before the Demo:

- Confirm attendees and their roles
- Understand their key pain points
- Prepare relevant industry examples

Demo Structure:

Segment	Duration	Focus
Opening	5 min	Confirm agenda, goals
Company Overview	5 min	Brief, credibility
Core Demo	30 min	Their pain points
Differentiators	10 min	SARS Sentinel, Audit Shield
Q&A	10 min	Address concerns

Key Demo Flows:

For Financial Teams:

Dashboard → GL Entry → Bank Reconciliation → Trial Balance → SARS Sentinel

For Operations Teams:

Dashboard → Inventory → Purchase Order → Receiving → Stock Report

For HR Teams:

Dashboard → Employee List → Leave Request → Payrun → Payslip → IRP5

Always Show:

- Clean, modern interface
- SARS Sentinel (unique!)
- Audit Shield (unique!)
- Mobile responsiveness

Stage 3: Proposal (24-48 hours after demo)

Proposal Contents:

1. Executive Summary
2. Solution Overview
3. Implementation Plan
4. Investment Summary
5. ROI Analysis
6. Next Steps

Pricing Presentation:

Component	Description	Monthly
Platform Fee	Core system, updates, hosting	R8,000 - R15,000
User Licenses	Per active user	R650 - R1,500
Implementation	One-time setup (amortize if needed)	Quote
Training	Included in platform	R0
Support	Included in platform	R0

Always Include:

- Total monthly cost
- Annual total
- Comparison to current state
- ROI calculation
- Payment terms

Stage 4: Negotiation

Common Objections & Responses:

"It's too expensive"

"I understand budget is important. Let me ask—what's the cost of your current inefficiencies? Our clients typically save 10-20 hours per month on month-end alone. At R500/hour loaded cost, that's R5,000-R10,000 in savings monthly. When you factor in

reduced audit fees, faster collections, and fewer errors, most clients see positive ROI within 6 months."

"We're too small for an ERP"

"That's exactly why we built SiyaBusa. Traditional ERPs are overkill for growing businesses. We scale with you—start with what you need today, add more as you grow. Many of our happiest clients started with just 5 users."

"Implementation takes too long"

"Traditional ERPs, yes. SiyaBusa is different. We're cloud-based with pre-built SA configurations. Most clients are live in 2-4 weeks. We handle the data migration, you handle the business."

"We've invested too much in our current system"

"I hear that a lot. Let me ask—is your current system helping you grow, or holding you back? The real cost isn't what you've spent, it's the opportunity cost every month. We offer flexible transitions—run parallel if you want—to make the switch painless."

"My accountant/auditor uses Pastel"

"Great news—SiyaBusa exports standard formats that work with any accountant. Many of our clients' accountants love us because our audit trail and reports are cleaner than what they got before. We're happy to demo for your accountant if that helps."

Stage 5: Close

Buying Signals:

- Asking about implementation timeline
- Involving more stakeholders
- Asking for references
- Discussing specific use cases
- Negotiating terms

Closing Techniques:

Summary Close:

"Based on our conversations, you need [pain point 1], [pain point 2], and [pain point 3]. We've shown how SiyaBusa solves all of these for [price]. What questions do you have before we move forward?"

Next Step Close:

"The next step is a 30-minute call with your team to answer any final questions and schedule your kickoff. Does Tuesday or Wednesday work better?"

Urgency Close (use sparingly):

"We have implementation capacity starting in [timeframe]. If we sign by [date], we can have you live by [date], well before your year-end."

Pricing Guidelines

Standard Pricing

Tier	Users	Platform Fee	Per User	Typical Total
Starter	1-10	R8,000	R750	R15,500
Professional	11-50	R15,000	R950	R34,000 (25 users)
Enterprise	51-200	R25,000	R1,200	R85,000 (50 users)
Corporate	201+	Custom	R1,500	Custom

Discount Authority

Discount	Approval Needed
Up to 10%	Sales Rep
11-20%	Sales Manager
21-30%	Director
30%+	CEO

When to Discount

Good reasons:

- Multi-year commitment (10-15%)
- Large user count (volume)
- Strategic account (reference, industry)
- Competitive situation

Avoid discounting for:

- "Just because"
- Without getting something in return
- Early in the sales process
- To close faster

Competition

SAP Business One

Their Strengths:

- Brand recognition
- Global support network
- Deep functionality

Our Advantages:

- 60-70% lower cost
- Faster implementation
- Better SA compliance
- More modern UI

When They Come Up:

"SAP is a great product for global enterprises. For South African mid-market, you're paying for features you don't need. We built SiyaBusa specifically for businesses like yours—all the functionality, none of the complexity or cost."

Sage Intacct / Sage X3

Their Strengths:

- SA market presence
- Accountant familiarity
- Established ecosystem

Our Advantages:

- 40-50% lower cost
- SARS Sentinel (unique)
- Audit Shield (unique)
- More modern interface

When They Come Up:

"Sage has been in SA for years. What they don't have is SARS integration or audit preparation. That's 10+ hours a month for most finance teams. Plus, we're typically 40-50% less expensive with more features included."

Xero / QuickBooks

Their Strengths:

- Low entry price
- Easy to use
- Good for small business

Our Advantages:

- Full ERP functionality
- Manufacturing, Inventory, HR
- Better for growing companies
- SA compliance

When They Come Up:

"Xero is great for small businesses that just need accounting. Once you add inventory, manufacturing, HR, or compliance needs, you end up with multiple systems that don't talk to each other. SiyaBusa gives you one integrated system that scales with you."
