SiyaBusa ERP - Inventory Module Training

INVENTORY MODULE TRAINING

Complete inventory training including Product Management, Warehouse Management, Stock Movements, Stock Takes, and Inventory Reports.

Complete Training Guide for Inventory & Warehouse Teams

Training Overview

Duration: 3-4 hours

Prerequisites: Getting Started Guide completed

Certification: Inventory Specialist

Assessment: 35 questions, 80% to pass

Module 1: Product Management (30 minutes)

Learning Objectives

- Create and manage products
 - Set up product categories
 - Configure units of measure
 - Manage product variants
-

1.1 Understanding Products in SiyaBusa

Product Types:

Type	Description	Use Case
Stock Item	Physical goods you buy/sell	Raw materials, finished goods
Non-Stock Item	Items not tracked in inventory	Services, consumables
Assembly	Product made from components	Kits, bundles
Service	Labor or service items	Installation, consulting

1.2 Creating a Product

Step-by-Step:

1. Navigate to **Inventory** → **Products**
2. Click **+ Add Product**
3. Complete the form:

Basic Information Tab:

Field	Required	Description
Product Code	Yes	Unique identifier (SKU)
Product Name	Yes	Display name
Product Type	Yes	Stock/Non-Stock/etc.
Category	Yes	For grouping
Description	No	Detailed description
Barcode	No	For scanning

Purchasing Tab:

Field	Description
Preferred Supplier	Default supplier
Purchase Price	Cost price
Purchase UOM	Unit for buying
Lead Time	Days to receive
Minimum Order	Minimum quantity

Selling Tab:

Field	Description
Selling Price	Standard price
Selling UOM	Unit for selling
Tax Code	VAT treatment
Sales Account	Revenue account

Inventory Tab:

Field	Description
Track Inventory	Yes/No
Reorder Level	When to reorder
Reorder Quantity	How much to order
Default Warehouse	Primary storage

4. Click **Save**

1.3 Product Categories

Setting Up Categories:

1. Go to **Inventory** → **Setup** → **Categories**
2. Click **+ Add Category**
3. Enter:

- Category Code
- Category Name
- Parent Category (for hierarchy)

4. Click **Save**

Example Hierarchy:

```

Electronics
├── Computers
│   ├── Laptops
│   └── Desktops
├── Accessories
│   ├── Keyboards
│   └── Mice
└── Cables
  
```

1.4 Units of Measure

Creating UOMs:

1. Go to **Inventory** → **Setup** → **Units of Measure**
2. Click **+ Add**
3. Configure:
 - Code: EA, BOX, KG, LTR
 - Name: Each, Box, Kilogram, Litre
 - Conversion factor (if needed)

Conversion Example:

```

1 BOX = 12 EA
1 PALLET = 48 BOX = 576 EA
  
```

1.5 Practice Exercise

Exercise 1: Create Products

Create the following products:

1. Laptop Dell XPS 15
 - SKU: DELL-XPS15
 - Category: Electronics > Computers > Laptops

- Purchase Price: R25,000
- Selling Price: R32,500
- Reorder Level: 5

Module 2: Warehouse Management (30 minutes)

Learning Objectives

- Set up warehouses and locations
- Configure bin locations
- Manage multi-warehouse operations
- Understand location hierarchies

2.1 Warehouse Structure

```
Company
├── Warehouse (e.g., Johannesburg DC)
│   ├── Zone (e.g., Zone A - Electronics)
│   │   ├── Aisle (e.g., Aisle 01)
│   │   │   ├── Shelf (e.g., Shelf A)
│   │   │   │   └── Bin (e.g., BIN-001)
```

2.2 Creating a Warehouse

Step-by-Step:

1. Go to **Inventory** → **Warehouses**
2. Click **+ Add Warehouse**
3. Complete:

Field	Description
Warehouse Code	JHB-DC
Warehouse Name	Johannesburg Distribution Centre
Address	Physical address
Contact	Warehouse manager
Default	Is this the primary warehouse?

4. Click **Save**

2.3 Creating Locations/Bins

Step-by-Step:

1. Select warehouse
2. Go to **Locations** tab
3. Click **+ Add Location**
4. Configure:

Field	Example
Location Code	A-01-01-001
Location Name	Aisle A, Shelf 1, Bin 1
Zone	Zone A
Type	Storage/Receiving/Shipping
Capacity	Maximum units

Bulk Create Locations:

1. Click **Generate Locations**
2. Set patterns:
 - Aisles: A-F
 - Shelves: 01-10
 - Bins: 001-050
3. Click **Generate**

2.4 Location Types

Type	Purpose
Storage	Regular inventory storage
Receiving	Goods receipt staging
Shipping	Dispatch staging
Quality	Inspection hold area
Returns	Customer returns
Damaged	Damaged goods

2.5 Practice Exercise

Exercise 2: Set Up Warehouse

1. Create a warehouse: Cape Town Distribution
2. Add 3 zones: Electronics, General, Cold Storage
3. Generate bin locations for Electronics zone

Module 3: Stock Movements (45 minutes)

Learning Objectives

- Receive goods into inventory
- Issue goods from inventory
- Transfer between warehouses
- Adjust stock levels

3.1 Types of Stock Movements

Movement	Effect	Trigger
Goods Receipt	Increases stock	Purchase order
Goods Issue	Decreases stock	Sales order
Transfer	Moves between locations	Transfer order
Adjustment	Corrects quantity	Stock count
Write-off	Removes damaged stock	Damage report

3.2 Receiving Goods (Goods Receipt)

From Purchase Order:

1. Go to **Inventory** → **Goods Receipts**
2. Click **+ New Receipt**
3. Select **From Purchase Order**
4. Choose the PO
5. Verify quantities received:

Item	Ordered	Received	Variance
Laptop XPS	10	10	0
Keyboard	20	18	-2

6. Select storage location
7. Click **Receive**

Direct Receipt (No PO):

1. Click **Direct Receipt**
2. Select supplier
3. Add items manually
4. Complete receipt

3.3 Issuing Goods (Goods Issue)

From Sales Order:

1. Go to **Inventory** → **Goods Issues**
2. Click **+ New Issue**
3. Select **From Sales Order**
4. Choose the SO
5. Confirm quantities and locations
6. Click **Issue**

Pick List Generation:

1. Select multiple orders
2. Click **Generate Pick List**
3. Print pick list
4. Complete picking
5. Confirm issue

3.4 Stock Transfers

Between Warehouses:

1. Go to **Inventory** → **Transfers**
2. Click **+ New Transfer**
3. Configure:

Field	Selection
From Warehouse	Johannesburg DC
To Warehouse	Cape Town DC
Transfer Date	Today

4. Add items:

Item	Quantity	From Bin	To Bin
Laptop XPS	5	A-01-001	B-01-001

5. Click **Create Transfer**
6. Status: **In Transit**
7. At destination, click **Receive Transfer**

3.5 Stock Adjustments

When to Adjust:

- Physical count differences
- System errors
- Damage discovered
- Theft

Step-by-Step:

1. Go to **Inventory** → **Adjustments**
2. Click **+ New Adjustment**
3. Select reason:
 - Stock Count Variance
 - Damage
 - Theft
 - System Correction
4. Add items and quantities (+/-)
5. Add notes/documentation
6. Submit for approval
7. Once approved, adjustment posts

3.6 Practice Exercise

Exercise 3: Stock Movements

1. Receive 10 units of Laptop XPS into Johannesburg DC
2. Transfer 3 units to Cape Town DC
3. Create an adjustment for 1 damaged unit

Module 4: Stock Takes (30 minutes)

Learning Objectives

- Plan and execute stock counts
- Handle count variances

- Complete stock take reconciliation
- Generate count reports

4.1 Types of Stock Takes

Type	Scope	Frequency
Full Count	All inventory	Annually
Cycle Count	Portion of inventory	Weekly/Monthly
Spot Check	Random items	As needed
Perpetual	Triggered by movement	Continuous

4.2 Planning a Stock Take

Step-by-Step:

1. Go to **Inventory** → **Stock Takes**
2. Click **+ New Stock Take**
3. Configure:

Field	Description
Type	Full/Cycle/Spot
Warehouse	Select warehouse
Date	Scheduled date
Categories	Filter by category
Locations	Filter by location
Count Team	Assigned counters

4. Click **Create**
5. Status: **Planned**

4.3 Generating Count Sheets

1. Open the stock take

2. Click **Generate Count Sheets**
3. Options:
 - Sort by location or product
 - Include/exclude expected quantities
 - Print barcodes
4. Print or download sheets
5. Distribute to count team

4.4 Conducting the Count

Best Practices:

- Count during low activity periods
- Use two-person teams (one counts, one records)
- Count by location, not by product
- Mark completed areas
- Don't move stock during count

4.5 Entering Count Results

Option 1: Manual Entry

1. Open stock take
2. Click **Enter Counts**
3. Enter quantities for each item
4. Save progress

Option 2: Barcode Scanning

1. Use mobile device
2. Scan item barcode
3. Enter quantity
4. Scan next item
5. Upload when complete

4.6 Variance Analysis

After counts are entered:

1. Click **Analyze Variances**

2. Review discrepancies:

Item	System Qty	Counted	Variance	Value
Laptop XPS	45	44	-1	-R25,000
Keyboard	120	122	+2	+R400

3. Investigate significant variances

4. Recount if needed

4.7 Completing Stock Take

1. Review all variances

2. Add notes for discrepancies

3. Get approval (if required)

4. Click **Post Adjustments**

5. System creates adjustment entries

6. Stock take closed

4.8 Practice Exercise

Exercise 4: Conduct Stock Take

1. Create a cycle count for the Electronics category

2. Generate count sheets

3. Enter count results (simulate some variances)

4. Analyze and explain variances

5. Post adjustments

Module 5: Inventory Reports (30 minutes)

Learning Objectives

- Run standard inventory reports
- Analyze stock levels
- Monitor slow-moving items

- Track inventory value

5.1 Key Inventory Reports

Report	Purpose	Frequency
Stock on Hand	Current quantities	Daily
Stock Valuation	Inventory value	Monthly
Stock Movement	All movements for period	Weekly
Reorder Report	Items below reorder level	Daily
Slow Moving	Items not selling	Monthly
Dead Stock	Zero movement items	Quarterly
Stock Aging	Age analysis	Monthly

5.2 Stock on Hand Report

What it Shows:

- Product code and name
- Quantity per warehouse
- Quantity per location (bin level)
- Available vs committed

Running the Report:

1. Go to **Reports** → **Inventory** → **Stock on Hand**
2. Select parameters:
 - As at date
 - Warehouse (all or specific)
 - Category filter
 - Show zero quantities
3. Click **Generate**

5.3 Stock Valuation Report

Valuation Methods:

Method	Description
FIFO	First In, First Out
Weighted Average	Average cost
Standard Cost	Predetermined cost

Report Shows:

- Product
- Quantity on hand
- Unit cost
- Total value

5.4 Reorder Report

Configuration:

1. Products must have reorder levels set
2. Go to **Reports** → **Inventory** → **Reorder Report**
3. Shows all items at or below reorder level
4. Click **Create Purchase Orders** to auto-generate POs

5.5 Practice Exercise

Exercise 5: Inventory Reports

1. Run a Stock on Hand report for all warehouses
2. Generate a Stock Valuation report
3. Run the Reorder Report and identify items to order

Module 6: Advanced Features (30 minutes)

Learning Objectives

- Configure serial/batch tracking

- Set up expiry date tracking
 - Manage product variants
 - Use barcode scanning
-

6.1 Serial Number Tracking

When to Use:

- High-value items
- Warranty tracking
- Regulatory requirements

Setup:

1. Edit product
2. Enable **Track by Serial Number**
3. Choose serialization:
 - On Receipt
 - On Issue
 - Both

During Receipt:

1. Enter or scan serial numbers
2. One serial per unit
3. Serials must be unique

6.2 Batch/Lot Tracking

When to Use:

- Manufacturing batches
- Expiry dates
- Recall management

Setup:

1. Edit product
2. Enable **Track by Batch**

3. Configure batch properties

During Receipt:

1. Enter batch number
2. Enter batch quantity
3. Add expiry date if applicable

6.3 Expiry Date Management

Configuration:

1. Enable batch tracking
2. Set **Track Expiry Dates**
3. Configure alert thresholds:
 - Warning: 30 days before
 - Critical: 7 days before

Reports:

- Expiring Stock Report
- Expired Stock Report
- FEFO (First Expiry First Out) pick list

6.4 Product Variants

Use Case:

T-Shirts come in Size (S/M/L/XL) and Color (Red/Blue/Black)

Setup:

1. Create variant attributes:
 - Size: S, M, L, XL
 - Color: Red, Blue, Black
2. Create base product
3. Enable variants
4. Assign attributes
5. System generates variant matrix:

Variant	SKU
T-Shirt-S-Red	TS-S-R
T-Shirt-S-Blue	TS-S-B
T-Shirt-M-Red	TS-M-R
...	...

6.5 Barcode Scanning

Supported:

- USB barcode scanners
- Mobile device cameras
- Bluetooth scanners

Functions:

- Add to stock
- Issue from stock
- Stock count
- Transfer
- Lookup product

Assessment Preparation

Key Topics

1. Product setup and types
2. Warehouse structure
3. Stock movements (receipt, issue, transfer)
4. Stock takes and adjustments
5. Inventory reports
6. Serial/batch tracking

Sample Questions

Q1: What happens to inventory when you post a Goods Receipt?

- A) Decreases
- B) Increases
- C) No change
- D) Transfers

Q2: What is the purpose of a reorder level?

- A) Maximum stock allowed
- B) Point to trigger new order
- C) Minimum selling price
- D) Warehouse capacity

Quick Reference Card

Common Navigation

Task	Path
New Product	Inventory → Products → + Add
Goods Receipt	Inventory → Goods Receipts → + New
Stock Transfer	Inventory → Transfers → + New
Stock Take	Inventory → Stock Takes → + New
Stock on Hand	Reports → Inventory → Stock on Hand

Keyboard Shortcuts

Shortcut	Action
Ctrl + /	Search products
F1	Scan barcode
Ctrl + R	Quick receipt
Ctrl + I	Quick issue
