ROI Overview

Why ROI Matters

Investing in ERP is a significant decision. This calculator helps quantify the financial impact of implementing SiyaBusa ERP, demonstrating clear return on investment through:

- **Cost Reduction** - Lower software, labor, and operational costs
- **Productivity Gains** - Time savings across the organization
- **Revenue Growth** - Better decisions, faster quotes, improved cash flow
- **Risk Mitigation** - Compliance, audit readiness, reduced errors

ROI Formula

$$\text{ROI} = (\text{Total Benefits} - \text{Total Costs}) / \text{Total Costs} \times 100$$

Example:

$$\text{ROI} = (\text{R}500,000 - \text{R}150,000) / \text{R}150,000 \times 100 = 233\%$$

Typical SiyaBusa ROI

Business Size	Typical ROI (Year 1)	Payback Period
Small (1-10 employees)	150-250%	3-6 months
Medium (11-50 employees)	200-350%	4-8 months
Large (51-200 employees)	250-400%	6-12 months
Enterprise (200+)	300-500%+	8-18 months

Cost Savings Categories

2.1 Software Cost Reduction

Current State Analysis:

Current Software	Monthly Cost	Annual Cost
Accounting (e.g., Pastel, Sage)	R_____	R_____
Payroll (e.g., VIP, Sage Payroll)	R_____	R_____
Inventory (e.g., spreadsheets, custom)	R_____	R_____
CRM (e.g., Salesforce, HubSpot)	R_____	R_____
Other software	R_____	R_____
Total Current	R_____	R_____

SiyaBusa Cost:

SiyaBusa Plan	Monthly Cost	Annual Cost
[Plan] Subscription	R_____	R_____
Additional Users	R_____	R_____
Total SiyaBusa	R_____	R_____

Annual Software Savings:

Software Savings = Current Software Costs - SiyaBusa Costs
= R_____ - R_____ = R_____ per year

2.2 IT Infrastructure Savings

Cost Category	Current (On-Premise)	SiyaBusa (Cloud)	Savings
Server hardware	R_____	R0	R_____
Server maintenance	R_____	R0	R_____
Backup systems	R_____	Included	R_____
IT staff (ERP admin)	R_____	Reduced	R_____
Disaster recovery	R_____	Included	R_____
Total Infrastructure	R_____	R_____	R_____

2.3 Integration Cost Savings

Current Integration	Annual Cost	With SiyaBusa	Savings
Manual data entry between systems	R_____	Automated	R_____
Custom integrations maintenance	R_____	Native	R_____
API subscriptions	R_____	Included	R_____
Total Integration	R_____	R_____	R_____

Productivity Gains

3.1 Finance & Accounting

Task	Current Time	With SiyaBusa	Time Saved	Value
Monthly close	____ days	____ days	____ days	R____
Bank reconciliation	____ hours	____ hours	____ hours	R____
Invoice processing	____ min/invoice	____ min/invoice	____ min	R____
Report generation	____ hours	____ hours	____ hours	R____
VAT returns	____ hours	____ hours	____ hours	R____
Audit preparation	____ days	____ days	____ days	R____
Total Finance				R____/year

Benchmark Time Savings:

Process	Industry Average	SiyaBusa Average	Improvement
Monthly close	10-15 days	3-5 days	60-70% faster
Bank reconciliation	8 hours	1 hour	87% faster
Invoice processing	15 min	3 min	80% faster
Report generation	4 hours	5 minutes	98% faster
VAT returns	8 hours	30 minutes	94% faster

3.2 HR & Payroll

Task	Current Time	With SiyaBusa	Time Saved	Value
Payroll processing	____ hours	____ hours	____ hours	R____
Leave management	____ hours/month	____ hours/month	____ hours	R____
Employee onboarding	____ hours	____ hours	____ hours	R____
IRP5 generation	____ hours	____ hours	____ hours	R____
Total HR				R____/year

Calculation Formula:

Time Savings Value = Hours Saved × Hourly Labor Cost × 12 months

Example:

Payroll: 8 hours saved × R200/hour × 12 = R19,200/year

3.3 Sales & Operations

Task	Current Time	With SiyaBusa	Time Saved	Value
Quote generation	____ hours	____ hours	____ hours	R____
Order processing	____ hours	____ hours	____ hours	R____
Inventory counts	____ hours	____ hours	____ hours	R____
Purchase orders	____ hours	____ hours	____ hours	R____
Reporting	____ hours	____ hours	____ hours	R____
Total Operations				R____/year

3.4 Total Productivity Savings

Total Productivity Value = Finance + HR + Sales + Operations

= R____ + R____ + R____ + R____

= R____ per year

Revenue Impact

4.1 Faster Quote-to-Cash

Metric	Before	After	Improvement	Revenue Impact
Quote turnaround	____ days	____ days	____% faster	R____
Order processing	____ days	____ days	____% faster	R____
Invoice accuracy	____%	____%	____% better	R____
Total				R____

Calculation:

Revenue from Faster Quotes = (Current Sales × Win Rate Improvement) × Margin

Example:

R5M sales × 5% win rate improvement × 30% margin = R75,000 additional profit

4.2 Improved Cash Flow

Metric	Before	After	Improvement	Value
Days Sales Outstanding (DSO)	____ days	____ days	____ days	R____
Early payment discounts captured	____%	____%	____%	R____
Late payment penalties avoided	R____/year	R____/year	R____/year	R____
Total				R____

DSO Improvement Calculation:

DSO Value = (Annual Revenue / 365) × Days Reduced × Cost of Capital

Example:

(R10M / 365) × 15 days × 12% = R49,315 saved

4.3 Inventory Optimization

Metric	Before	After	Improvement	Value
Inventory turnover	____ times	____ times	____%	R____
Stockout reduction	____%	____%	____%	R____
Dead stock reduction	R____	R____	R____	R____
Total				R____

Inventory Carrying Cost Reduction:

Inventory Savings = Average Inventory Reduction × Carrying Cost (typically 20-30%)

Example:

R500,000 inventory reduction × 25% carrying cost = R125,000 saved

4.4 Total Revenue Impact

Total Revenue Impact = Quote-to-Cash + Cash Flow + Inventory
= R____ + R____ + R____
= R____ per year

Risk Reduction Value

5.1 Compliance Penalties Avoided

Risk Area	Potential Penalty	Risk Reduction	Value
VAT non-compliance	R____	95% reduction	R____
PAYE penalties	R____	95% reduction	R____
Audit findings	R____	80% reduction	R____
Late submissions	R____	99% reduction	R____
Total Compliance			R____

5.2 Error Reduction

Error Type	Current Cost	With SiyaBusa	Savings
Data entry errors	R_____	R_____	R_____
Duplicate payments	R_____	R_____	R_____
Pricing errors	R_____	R_____	R_____
Inventory discrepancies	R_____	R_____	R_____
Total Errors	R_____	R_____	R_____

5.3 Business Continuity

Benefit	Value
Automated backups (vs. manual)	R_____
Disaster recovery capability	R_____
99.9% uptime guarantee	R_____
Total Business Continuity	R_____

5.4 Total Risk Reduction Value

Total Risk Value = Compliance + Errors + Business Continuity
= R_____ + R_____ + R_____
= R_____ per year

TCO Comparison

6.1 Total Cost of Ownership (5-Year)

Cost Category	Current System	SiyaBusa	Savings
Year 1			
Software licenses	R_____	R_____	R_____
Implementation	R_____	R_____	R_____
Hardware	R_____	R0	R_____
Training	R_____	Included	R_____
Support	R_____	Included	R_____
Year 1 Total	R_____	R_____	R_____
Years 2-5			
Annual licenses	R_____	R_____	R_____
Maintenance	R_____	Included	R_____
Upgrades	R_____	Included	R_____
Support	R_____	Included	R_____
Per Year Total	R_____	R_____	R_____
5-Year TCO	R_____	R_____	R_____

6.2 Hidden Costs Often Overlooked

Hidden Cost	Traditional ERP	SiyaBusa
Upgrade projects (every 3-5 years)	R100K-500K	R0 (included)
Security patches	R20K-50K/year	R0 (included)
Database maintenance	R30K-100K/year	R0 (included)
Server refresh (every 5 years)	R100K-300K	R0 (cloud)
Consultant fees for changes	R1,500/hour	Minimal
Total Hidden Costs (5 years)	R500K-1.5M	R0

ROI Calculation Worksheet

7.1 Summary of Benefits

Benefit Category	Annual Value
Software Cost Savings	R_____
Infrastructure Savings	R_____
Integration Savings	R_____
Productivity Gains - Finance	R_____
Productivity Gains - HR	R_____
Productivity Gains - Operations	R_____
Revenue Impact	R_____
Risk Reduction	R_____
Total Annual Benefits	R_____

7.2 Total Investment

Investment Category	Amount
Year 1 Subscription	R_____
Implementation Services	R_____
Additional Training	R_____
Total Year 1 Investment	R_____

7.3 ROI Calculation

ROI CALCULATION

Total Annual Benefits:

R _____

Total Year 1 Investment:

R _____

Net Benefit (Year 1):
(Benefits - Investment)

R _____

ROI Percentage:
(Net Benefit / Investment × 100)

_____ %

Payback Period:
(Investment / Monthly Benefits)

_____ months

3-Year Net Value:
(Benefits × 3 - Investment)

R _____

5-Year Net Value:
(Benefits × 5 - Investment)

R _____

Industry Benchmarks

8.1 ROI by Industry

Industry	Typical ROI	Primary Value Drivers
Manufacturing	250-400%	Inventory optimization, production efficiency
Retail/Wholesale	200-350%	Inventory turns, multi-channel management
Professional Services	300-450%	Billable time capture, project profitability
Construction	200-300%	Project costing, subcontractor management
Healthcare	250-400%	Patient billing, compliance
Agriculture	200-350%	Traceability, resource optimization

8.2 Average Improvements

Metric	Industry Average Improvement
Month-end close time	50-70% faster
Invoice processing	75-90% faster
Inventory accuracy	95%+ (from 70-80%)
On-time payments	25-40% improvement
Reporting time	90%+ reduction
Audit preparation	60-80% reduction
Quote turnaround	50-75% faster
Customer satisfaction	15-25% increase

8.3 Payback Period Benchmarks

Investment Size	Typical Payback
< R100,000	2-4 months
R100,000 - R250,000	4-8 months
R250,000 - R500,000	6-12 months
> R500,000	9-18 months

Case Study Examples

9.1 Small Business Example

Company Profile:

- Manufacturing company
- 15 employees
- R8 million annual revenue
- Current: Pastel Partner + Excel + manual payroll

Investment:

Item	Cost
SiyaBusa Professional (Annual)	R129,990
Implementation (Standard)	R35,000
Total Investment	R164,990

Benefits:

Category	Annual Value
Software consolidation	R45,000
Time savings (Finance)	R96,000
Time savings (HR)	R24,000
Inventory optimization	R80,000
Error reduction	R15,000
Total Benefits	R260,000

Results:

- **ROI: 158%**
- **Payback: 7.6 months**
- **5-Year Net Value: R1.14 million**

9.2 Medium Business Example

Company Profile:

- Wholesale distribution
- 45 employees
- R35 million annual revenue
- Current: Sage 300 + separate WMS + Sage Payroll

Investment:

Item	Cost
SiyaBusa Enterprise (Annual)	R299,990
Implementation (Advanced)	R65,000
Custom integrations	R30,000
Total Investment	R394,990

Benefits:

Category	Annual Value
Software consolidation	R180,000
Time savings (All departments)	R320,000
Inventory optimization	R350,000
Cash flow improvement	R85,000
Compliance/Risk	R50,000
Total Benefits	R985,000

Results:

- **ROI: 249%**
- **Payback: 4.8 months**
- **5-Year Net Value: R4.53 million**

9.3 Enterprise Example

Company Profile:

- Multi-entity construction group
- 200 employees
- R150 million annual revenue
- Current: SAP Business One + multiple systems

Investment:

Item	Cost
SiyaBusa Enterprise (Annual)	R599,990
Implementation (Enterprise)	R250,000
Integrations & customization	R150,000
Total Investment	R999,990

Benefits:

Category	Annual Value
Software consolidation	R450,000
Time savings	R800,000
Project profitability improvement	R600,000
Cash flow improvement	R250,000
IT cost reduction	R200,000
Compliance/Risk	R150,000
Total Benefits	R2,450,000

Results:

- **ROI: 245%**
- **Payback: 4.9 months**
- **5-Year Net Value: R11.25 million**

ROI Timeline

10.1 When to Expect Results

Month 1-2: IMPLEMENTATION

- |— System deployed
- |— Users trained
- |— Initial efficiency gains begin
- |— Value: 10% of annual benefits realized

Month 3-6: STABILIZATION

- |— Users proficient
- |— Processes optimized
- |— Automation delivering value
- |— Value: 50% of annual benefits realized

Month 6-12: OPTIMIZATION

- |— Advanced features utilized
- |— Custom reports driving decisions
- |— Full productivity gains
- |— Value: 100% of annual benefits realized

Year 2+: GROWTH

- |— Continuous improvement
- |— New module adoption
- |— Compounding returns
- |— Value: 110-120% of Year 1 benefits

10.2 Cumulative Value Over Time

Time Period	Cumulative Benefits	Cumulative Costs	Net Value
Month 3	R_____	R_____	R_____
Month 6	R_____	R_____	R_____
Year 1	R_____	R_____	R_____
Year 2	R_____	R_____	R_____
Year 3	R_____	R_____	R_____
Year 5	R_____	R_____	R_____
