SiyaBusa ERP - Investor Pitch Deck

Seed Funding Round

The ERP Platform African Businesses Have Been Waiting For

Investment Opportunity: R2,850,000 (\$150,000 USD)

Pre-Revenue | Production-Ready | Market-Validated Concept

January 2026

Executive Summary

What We've Built

SiyaBusa ERP is a **production-ready**, cloud-native Enterprise Resource Planning platform purpose-built for South African mid-market businesses. We have developed:

Achievement	Status
25+ Complete Modules	Deployed
400+ API Endpoints	Live
228+ Database Tables	Production
50,000+ Lines of Code	Written
AWS Infrastructure	Running
9 AI Assistants	Functional

Total Development Investment to Date: ~R3,500,000 (18 months of development)

What We're Asking For

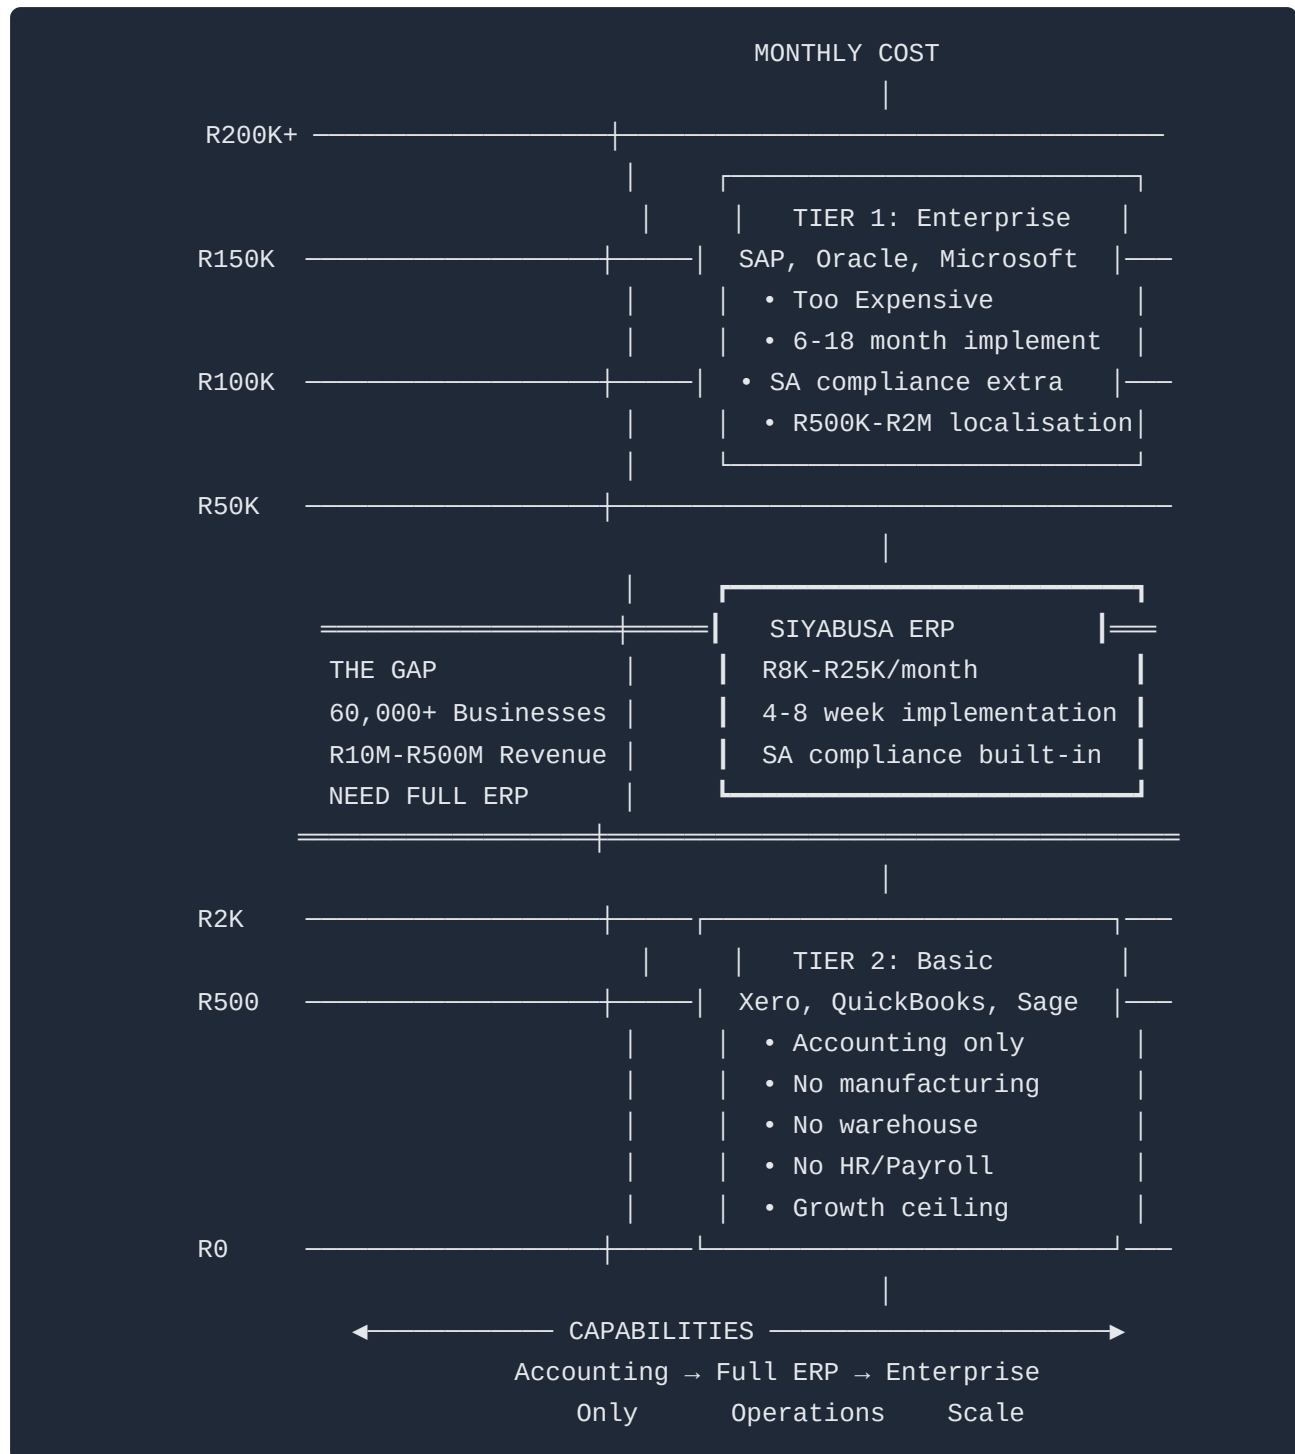

Item	Amount (ZAR)
Seed Investment Request	R2,850,000
Runway	12 months
Use of Funds	Operations + Marketing + Testing
Revenue Start	Q2 2027 (post-dependency creation)

Why This Investment is Low-Risk

Factor	Evidence
Product Exists	Not a concept — working software deployed on AWS
Market Validated	R50K-R200K/month competitors prove demand exists
Gap is Real	60,000+ SA businesses need full ERP but can't afford current options
Team is Committed	18 months of bootstrapped development proves dedication
Clear Path to Revenue	Beta → Dependency → Subscription model

The Problem (Market Opportunity)

The Two-Tier ERP Crisis in South Africa

Total Addressable Market

Segment	Size	Source
SA Mid-Market Businesses	60,000+ companies	Stats SA Business Register (2024)
Revenue Range	R10M - R500M annually	SARS Company Tax Statistics
Current Spend	R500 - R200K/month on software	Gartner SA Enterprise Software Report
Growth Rate	18% YoY (enterprise software)	IDC South Africa IT Spending Forecast

TAM Calculation (Verifiable)

Source: Statistics South Africa Business Register 2024

- Total registered businesses: 2.6 million
- Businesses with 50-500 employees: ~62,000 (2.4%)
- Of these, ~80% need ERP beyond basic accounting: ~50,000
- Including businesses with 20-50 employees needing full ERP: +10,000
- **Conservative Target: 60,000 businesses**

60,000 businesses × R12,000/month average × 12 months = R8.64 Billion/year
Even 1% market share = R86.4 Million ARR

Validation: Gartner estimates SA enterprise application market at \$1.2B (R22B) annually, of which ERP represents ~40% = R8.8B. Our TAM calculation aligns with independent research.

Our Solution

SiyaBusa ERP - Complete Business Management

Module Coverage

Category	Modules

Key Differentiators

1. Native South African Compliance

- PAYE, UIF, SDL calculations built-in
- SARS submission file generation
- BCEA leave entitlements automated
- B-BBEE scorecard tracking
- **No R500K-R2M localization projects needed**

2. AI-Powered Natural Language Interface

- Ask questions in plain English
- Get instant answers from your data
- 9 specialized AI agents
- 24/7 intelligent assistance

3. "Business Actions = Accounting Done"

- Approve a POD → Invoice + GL entries created automatically
- Run payroll → All accounting entries generated

- Receive goods → Inventory + accrual entries made
- **Zero double-entry by accountants**

4. 40% Below Competitor Pricing

- Same functionality as SAP Business One
 - Same per-user pricing model
 - 40% lower cost
 - **Faster implementation (4-8 weeks vs 6-12 months)**
-

Private Equity	4-6 years	Growth equity firms

Investment Terms

Offering Structure

Term	Detail	Justification
Investment Amount	R2,850,000	12 months runway to profitability
Investment Type	SAFE (Simple Agreement for Future Equity)	Standard early-stage instrument
Valuation Cap	R15,000,000	See calculation below
Discount Rate	20%	Standard SAFE discount
Use of Funds	As detailed above	Full transparency provided
Reporting	Monthly financial reports	Investor visibility

Valuation Cap Justification (R15,000,000)

Method 1: Development Cost + Premium

- Development investment to date: ~R3,500,000 (18 months)
- Working product premium: 2x = R7,000,000
- Market opportunity premium: 2x = R14,000,000
- **Rounded: R15,000,000**

Method 2: Comparable Transactions

- Pre-revenue B2B SaaS in SA typically valued at R10M-R20M
- Functional product with 25+ modules commands premium
- Native compliance = competitive moat
- **Range: R12M-R18M → Midpoint R15M**

Method 3: Forward Revenue Multiple

- Year 2 projected ARR: R11.5M
- Conservative 1.5x forward ARR (pre-revenue discount)
- **Implied: R17.25M → Conservative R15M**

Note: This valuation is intentionally founder-friendly to attract early believers who take on pre-revenue risk.
