3.0 PROJECT APPLICATION

3.1 CLASSIFICATION OF PROJECT

Classification	Tick	Project Description
Infrastructure Development Project	☐	
Income Generating Project	☐	Cattle Feedlot Farming - Construction and operation of 4 cattle feedlots for beef production, finishing 40 cattle for sale to abattoirs
Regional Project	☐	

4. PROJECT FULL DESCRIPTION

4.1. PURPOSE

The purpose of this project is to establish a sustainable cattle feedlot operation at Lushikishini to:

1. **Generate income** for 10 community members and their families through commercial beef production
2. **Create employment** opportunities in cattle farming and management
3. **Contribute to food security** by producing quality beef for the local market
4. **Develop agricultural skills** among youth and community members
5. **Demonstrate** the viability of feedlot farming as a rural enterprise model

The project will construct 4 feedlots (3 new + 1 existing) with capacity for 40 cattle. We will purchase weaner calves, finish them over 90-120 days, and sell to abattoirs for profit. The rotational model allows us to sell 10 cattle every month for consistent income.

4.2. BACKGROUND OF COMMUNITY (PROBLEMS)

The Lushikishini community under Chief Somtsewu faces several challenges:

1. **Limited employment opportunities** - Most residents depend on subsistence farming with little cash income
2. **Youth unemployment** - Young people leave the community seeking work in urban areas
3. **Underutilized resources** - The community has access to land, water, and crop residues suitable for cattle farming, but lacks capital to commercialize
4. **Traditional cattle farming** is slow (2-3 years to sell) and generates unpredictable income
5. **Poverty** - Families struggle to meet basic needs like school fees, healthcare, and household expenses

This project addresses these problems by creating a profitable agricultural enterprise that generates monthly income using locally available resources.

4.3. TARGET POPULATION

Direct Beneficiaries: - **10 members** (cooperative members who will share profits equally) - Males: 8 - Females: 2

Indirect Beneficiaries: - **50+ dependents** (family members of the 10 cooperative members) - **Wider community** - through skills transfer, employment of casual labor, and purchase of local feed/materials

Total beneficiaries: Approximately 60+ people

4.4. IMPACT (CHANGE AS A RESULT OF THE PROJECT)

Economic Impact: - Each member will earn approximately **E4,500 - E5,500 per month** (E54,000+ annually) - Combined annual income for all members: **E540,000+** - Reduced poverty and improved living standards for 10 households

Social Impact: - Youth retention in the community (alternative to urban migration) - Skills development in cattle management, business, and financial literacy - Model for other communities to replicate - Strengthened community cooperation and unity

Agricultural Impact: - Productive use of crop residues (reduces waste) - Introduction of modern cattle finishing techniques - Contribution to local beef supply - Manure production for organic fertilizer

Long-term Impact: - Sustainable income generation beyond the grant period - Potential for expansion and growth - Transfer of knowledge to next generation

5. CONTRIBUTIONS AND FINANCES

5.1. HAVE YOU RECEIVED ANY ASSISTANCE TO DATE FOR THIS PROPOSED PROJECT?

No

5.2. IF YES, FROM WHO?

N/A

5.3. HOW MUCH CASH HAVE YOU SPENT TO-DATE ON THE PROJECT?

E50,000 (value of 4 cattle owned = E40,000 + existing kraal = E10,000)

5.4. HOW MUCH DO YOU HAVE IN YOUR SAVINGS ACCOUNT?

E50,000 (in-kind contribution: 4 cattle + 1 built feedlot)

5.5. FINANCIAL BREAKDOWN OF THE PROJECT

6.1. WHAT IS YOUR MARKET?

Our primary market is **abattoirs** in the region. Abattoir buyers come directly to the farm to purchase and collect finished cattle, which eliminates transport costs for us.

Secondary potential markets include: - Local butcheries - Direct sales to consumers (for special occasions) - Livestock auctions

6.2. DO YOU HAVE ANY SALES AGREEMENT WITH YOUR MARKET?

We have **established relationships** with abattoir buyers who currently purchase cattle from the area. The buyers fetch the cattle themselves upon purchase.

(Note: A confirmation letter from buyers can be obtained and attached if required)

7. PROJECT MAINTENANCE AND REPAIR

7.1. WHO WILL OPERATE OR MANAGE THE PROJECT AFTER ITS COMPLETION?

Operations Manager: Seluleko Ndwandwe - Responsible for daily cattle management, feeding schedules, and health monitoring

Project Leader/Financial Manager: Sibusiso Mavuso - Responsible for overall project leadership, financial management, and business operations

Technical Advisor: Sanele Dlamini - Responsible for agricultural/feeding technical guidance

The 10 cooperative members will collectively operate the project, with clear roles and responsibilities as outlined in our Constitution (attached).

7.2. WHAT ARE HIS/HER EXPERIENCES AND QUALIFICATIONS?

Sibusiso Mavuso (Project Leader): - Qualified Accountant by training - Experience in financial management and business operations

Sanele Dlamini (Technical Advisor): - BSc Agriculture degree from University of Eswatini (UNESWA) - Qualified Agronomist with knowledge of animal nutrition and farming

Zakhele Dlamini (Environmental Compliance): - Qualified Environmentalist - Ensures sustainable and compliant farming practices

Seluleko Ndwandwe & Sibusiso Dlamini (Operations): - Hands-on experience in cattle farming and handling - Practical knowledge of local cattle management practices

7.3. HOW WILL YOU RAISE THE FUNDS FOR MAINTENANCE?

Maintenance funds will be raised through:

1. **Development Fund (10% of profits):** E5,010 per month set aside for infrastructure maintenance, equipment repair, and future expansion
2. **Emergency Reserve (10% of profits):** E5,010 per month for unexpected repairs and emergencies
3. **Monthly cash flow:** The project generates E50,100+ profit monthly, ensuring sufficient funds for ongoing maintenance

The Cooperative Constitution requires these reserves to be maintained before any profit distribution to members.

7.4. WHAT WILL BE THE TOTAL COST PER YEAR (MAINTENANCE)?

Annual Maintenance Budget:

Item	Annual Cost (E)
Feedlot repairs (fencing, troughs)	E15,000
Water system maintenance	E5,000

Item	Annual Cost (E)
Equipment maintenance	E5,000
Unexpected repairs	E10,000
TOTAL ANNUAL MAINTENANCE	E35,000

This is easily covered by the Development Fund allocation of E60,120 per year (E5,010 × 12 months).
