SiyaBusa ERP - Investment Brief

January 2026

Confidential — For Investor Review

The Opportunity in One Sentence

"We're bringing enterprise-grade ERP to the 95,000 South African SMEs that have outgrown QuickBooks but can't afford SAP — capturing the underserved middle market that traditional vendors ignore."

What We've Built

Metric	Status
Modules	25+ industry-specific modules available
API Endpoints	400+ production-ready
Infrastructure	Deployed on AWS (Cape Town region)
Technology	React + Node.js + PostgreSQL
Architecture	Multi-tenant SaaS
AI Capabilities	Natural language queries, smart automation

Note: Each customer receives modules tailored to their industry — logistics companies get logistics tools, manufacturers get production tools.

Core Modules (All Complete)

Business Operations

- ☒ Financial Accounting (GL, AP, AR, IAS-compliant)
- ☒ Inventory Management (multi-warehouse)
- ☒ Sales & CRM (quotes, invoicing, pipeline)
- ☒ Purchase Management (POs, supplier management)
- ☒ HR & Payroll (SARS-ready)
- ☒ Manufacturing (BOM, work orders)

Industry Verticals

- ☒ Healthcare (patient management)
- ☒ Construction (project costing)
- ☒ Property Management (leasing)
- ☒ Agriculture (farm operations)
- ☒ Mining (compliance, tracking)
- ☒ Logistics (fleet, fuel management)

The Market Gap

These businesses need:

- Multi-branch inventory ❌ QuickBooks can't do this
- Proper manufacturing/BOM ❌ QuickBooks can't do this
- Integrated HR/Payroll ❌ QuickBooks can't do this
- Custom industry modules ❌ QuickBooks can't do this

But they can't afford:

- R500K+ implementation
- R50K+/month licenses
- 6-18 month deployment timelines

Value Leadership Strategy

Traditional Approach	SiyaBusa Approach
Charge premium for basic features	Enterprise features at accessible prices
Generic one-size-fits-all	Industry-tailored configurations
Long implementations (6-18 months)	Rapid deployment (2-4 weeks)
Serve only the top 5%	Serve the underserved 95%

Key Insight: We're not competing for existing ERP customers.
We're creating new ERP customers from QuickBooks/Excel users.

What We're Asking

R200,000 for 4-Month Runway

Timeline: February → May 2026

Month	Activity	Milestone
Feb	Product polish, marketing launch	Campaigns live
Mar	Beta testing with 5+ users	Active daily usage
Apr	Pipeline building, demos	20+ qualified leads
May	Sign first customer	 First R3,000+ MRR

Where the Money Goes

Category	4 Months	%
Development & Operations	R82,500	41%
Marketing (Paid Ads + Content)	R35,500	18%
Infrastructure (AWS)	R27,500	14%
Customer Operations	R19,500	10%
Legal & Compliance	R14,000	7%
Business Setup (Payments, Hiring)	R9,500	5%
Contingency (~10%)	R11,500	6%
Total	R200,000	100%

Development & Operations covers technical oversight, code reviews, architecture guidance, client demos, and ongoing product quality.

Note: This is NOT for testing. The product is built. This is for market entry + customer acquisition.

Pricing Model: R980 Per User

Every User Pays — Covers Their Cost

Component	Amount
Standard Price	R980/user/month
Cost to serve per user	R380
Margin per user	R600 (61%)

Tier	Per User/Month	Min Users	Min Monthly
Starter	R980	5	R4,900
Professional	R931 (5% discount)	10	R9,310
Enterprise	R882 (10% discount)	25	R22,050

14-Day Free Trial — Then convert or lose access. No indefinite free usage.

Compare to Competitors:

- SAP Business One: R2,500 - R5,000/user/month
- Sage X3: R1,000 - R2,000/user/month
- ****Siyabusa: R980/user**** — Industry-tailored suite, 50-60% cheaper than SAP

Path to Revenue

Conservative Projections (R980/User)

Date	Customers	Avg Users	MRR	Commentary
May 2026	1	8	R7,840	First paying customer
Aug 2026	3	10	R29,400	Early traction
Dec 2026	8	10	R78,400	Past break-even
Jun 2027	20	12	R235,200	Scaling
Dec 2027	40	15	R588,000	Growth mode

Break-Even Analysis

Metric	Value
Monthly burn rate	~R41,400
Average customer value	~R7,840/month (8 users @ R980)
Break-even point	5-6 customers
Target date	Q3 2026 (September)

Key Insight: At R980/user, break-even requires only 5-6 small customers, not 25+.

What's NOT Being Asked

- ✗ We're NOT asking investors to pay to test the product
- ✗ We're NOT giving away free access (every user pays R980)
- ✗ We're NOT pricing below cost (61% margin per user)
- ✗ We're NOT competing head-to-head with SAP
- ✓ We ARE pricing competitively with Sage/mid-market ERPs
- ✓ We ARE ensuring each user covers their cost
- ✓ We HAVE a working product (see it live)
- ✓ We CAN break even with just 5-6 customers

Investment Structure Options

Option A: Bridge Loan

- Amount: R200,000
- Term: 12 months
- Interest: 0% (convert to equity at next round)
- Conversion: 20% discount to Series A valuation

Option B: SAFE Note

- Amount: R150,000 - R500,000
- Valuation Cap: R5,000,000
- Discount: 20%
- Pro-rata rights: Yes

Option C: Equity

- Amount: R500,000+
- Equity: 10-15%
- Pre-money: R5,000,000
- Board seat: Optional

Why Now?

1. ****Product is DONE**** - Not a mockup, not a prototype. Full ERP.
 2. ****AWS costs are LOW**** - ~R5,000/month infrastructure
 3. ****Market is READY**** - Post-COVID digitization wave
 4. ****Competition is EXPENSIVE**** - SAP/Oracle haven't adjusted pricing
 5. ****SA economy needs THIS**** - SMEs need tools to compete
-

Next Steps

1. ****See it live**** - 30-minute demo at your convenience
 2. ****Test it yourself**** - We'll set up a free instance for you
 3. ****Due diligence**** - Technical, financial, market questions welcome
 4. ****Decision**** - No pressure, but time is runway
