Message to Friend - Help Request

Option 1: WhatsApp/Text Message (Short)

Hey [Friend's Name]!

Hope you're well. I've been working on something big for the past 18 months and could really use your help.

I've built a complete ERP system (like SAP but for SA businesses) - it's actually working and deployed. Now I need help with:

1. Video demos - recording product walkthroughs
2. Marketing content - LinkedIn posts, social media

The paid position is R5,000-R10,000/month depending on hours. Even if you can't commit, I'd love to show you what we've built.

Can I call you this week to explain properly?

Option 2: Email/Longer Message

Subject: Need Your Help - Built Something Big

Hey [Friend's Name],

Hope this finds you well! I've been meaning to reach out because I've been working on something for the past 18 months that I'm really excited about, and I think you could help.

THE SHORT VERSION:

I've built a complete ERP system called SiyaBusa ERP. Think SAP or Sage, but:

- Built specifically for South African businesses
- Native SARS compliance (PAYE, UIF, SDL all automated)
- 40% cheaper than the big players
- Actually working - it's deployed on AWS right now

It's not a concept or pitch deck - it's 25+ modules, 400+ API endpoints, 228 database tables. Real software.

WHERE I NEED HELP:

1. VIDEO CONTENT CREATION (R10,000/month part-time)
 - Recording demo videos showing the system in action
 - Creating short-form content for LinkedIn/social media
 - Product walkthrough videos for each module
 - Testimonial-style content with beta partners
2. MARKETING CONTENT (R5,000/month part-time)
 - Writing LinkedIn posts and articles
 - Creating marketing scripts and copy
 - Helping with pitch presentations
 - Social media content calendar

This could be a few hours a week, flexible timing. I'm raising funding now, so these would be paid positions starting [month].

WHY I THOUGHT OF YOU:

[Personalize: e.g., "You've always been great at explaining complex things simply" or "Your experience with compliance/documentation" or "You understand both business and tech"]

WHAT I'M ASKING:

Can we grab coffee or jump on a call this week? I want to show you the system and explain the opportunity properly. Even if you can't commit, I'd value your perspective.

No pressure at all - just wanted to share what I've been building and see if it's something you'd be interested in being part of.

Let me know what works for you!

Cheers,
[Your Name]

P.S. Here's a quick screenshot of the system: [attach screenshot if you have one]

Option 3: Voice Note Script

Hey [Name], hope you're good!

Listen, I've been working on something for about 18 months now and I finally need to bring some people in to help.

Basically, I've built an ERP system - you know, like SAP or Sage, but designed for South African businesses. It's got everything - HR, payroll, inventory, accounting, the works. And it's actually done - like, deployed and working, not just an idea.

The thing is, I need help with two things:

First, documentation - writing user guides and training materials.

Second, getting SARS approval for our tax submission features.

I'm raising funding at the moment, so these would be paid positions - we're talking 5 to 10 thousand rand a month depending on hours, part-time, flexible.

I immediately thought of you because [personalize reason].

Can I show you what we've built? Even if you're not interested in helping, I think you'd find it cool. Let me know when you're free for a call or coffee.

Chat soon!

Key Points to Mention

When talking to your friend, make sure to cover:

What We Built

- Complete ERP system (not just an idea)

- 25+ modules (Finance, HR, Inventory, Manufacturing, etc.)
- Native South African compliance (SARS, BCEA, POPIA)
- AI assistants for natural language queries
- Actually deployed and working on AWS

What We Need Help With

Documentation Specialist Role:

- Write user guides for each module
- Create video script outlines
- Develop quick-start guides
- Build help center content
- Make technical features understandable

Compliance Assistant Role:

- Document our PAYE/UIF/SDL calculation methods
- Prepare SARS eFiling integration application
- Research SARS API requirements
- Help with regulatory correspondence
- Track compliance deadlines

What's In It For Them

- Part-time, flexible hours
- Work from anywhere
- Paid position (R5,000-R10,000/month)
- Get in early on something big
- Learn about ERP/fintech industry
- Potential for growth when company succeeds

Timeline

- Funding discussions: Now - February 2026
- Positions start: Once funding secured (target: February/March 2026)
- Beta program: January - March 2026
- Public launch: April 2026

Personalization Tips

Replace [Friend's Name] and add personal touches:

If they have documentation/writing experience:

"Your ability to explain complex things simply is exactly what we need. Our system is powerful but we need someone who can make it accessible to business owners who aren't tech-savvy."

If they have accounting/compliance experience:

"Your background in [accounting/tax/compliance] would be invaluable. We've built the calculations, but we need someone who understands the regulatory side to help us get SARS approval."

If they're looking for flexible work:

"I know you mentioned wanting more flexible work. This is part-time, work from anywhere, and you'd be helping build something meaningful for SA businesses."

If they're entrepreneurial:

"I know you've always been interested in startups. This is a chance to get involved early in something that's actually built and ready to launch."

Follow-Up Message (If No Response)

Hey [Name], just following up on my message from last week.

No pressure at all - I know everyone's busy. Just wanted to check if you'd be open to a quick 15-min call to show you what we've built?

If the timing isn't right, totally understand. Just thought of you when thinking about who'd be great for this.

Let me know either way!
