Masaphokati Technologies (Pty) Ltd | SiyaBusa ERP | Fiscal Year 2026/27

TOTAL RAISE	DEPLOYMENT PERIOD	PRIMARY FOCUS	TARGET MARKET	YEAR-END ARR TARGET
R2,000,000	12 Months	Sales · Marketing · People	SA SMEs (R10M-R500M)	R2.3M-R4.6M

REF: MT-INV-2026-001 | Version 2.0 | 13 April 2026

Executive Summary

SiyaBusa ERP is a **fully built, production-deployed** cloud ERP platform with 25+ modules, 400+ API endpoints, and native South African compliance (SARS, BCEA, POPIA, B-BBEE). The technology is complete. What we need now is a **commercial engine** to take it to market.

This R2,000,000 seed investment will be deployed across **12 months** to fund three things: **(1)** a dedicated sales team to actively hunt and close SME clients, **(2)** marketing infrastructure — merchandise, banners, digital campaigns, and trade show presence — to build visibility where South African SME decision-makers gather, and **(3)** back-office support staff to onboard, train, and retain every client we sign.

54% of the budget funds people directly (5 hires, phased). The remaining 46% funds the tools they need, the brand collateral they carry, and the events they attend. Commission for sales staff is paid from generated revenue — not from this budget — ensuring alignment between spend and outcomes.

Every price in this document is sourced from a named South African supplier, published SaaS pricing page, or recognised salary benchmark. A full source reference appendix is included at the end of this document.

-----------------	----------

COMMISSION STRUCTURE — SELF-FUNDED FROM REVENUE (NOT FROM THIS BUDGET)

Performance Bonus: 10% of Year 1 contract value per signed deal, paid on receipt of client’s first payment

Pricing: R399/user/month, all-inclusive. Average client = 20 users = **R7,980/month**

Example: Signing a 20-user client (R7,980/mo × 12 = R95,760/yr) = R9,576 commission per BDE

Quarterly Target: Each BDE targets 3 clients/quarter → 24+ new clients across both BDEs in 12 months

Revenue if target met: 36 clients × R7,980 avg/mo = **R263,340 MRR → R3.16M ARR by Month 12**

Commission is OTE paid from generated revenue — not from this R2M budget. This ensures BDE incentives are directly aligned with growth.

KEY TAKEAWAY

At **R399/user/month**, even the conservative scenario reaches R1.72M ARR with a 6.3:1 LTV:CAC ratio — well above the 3:1 SaaS gold standard. In the **base case**, 36 clients generate R3.16M ARR by Month 12 with an 80% gross margin. The CAC payback is just 3 months. Technology risk is zero — **what we are buying is customers**.

Key Assumptions

- All prices are **exclusive of VAT** unless otherwise stated. VAT at 15% will apply to physical goods and SA-domiciled services.
- USD-denominated SaaS tools converted at an indicative exchange rate of **R18.00 : USD 1.00** (April 2026 mid-rate).
- Salary figures are **Cost to Company (CTC)** — inclusive of basic salary, UIF, SDL, and company contributions. Take-home pay differs by individual tax profile.
- BDE commission (10% of Year 1 contract value) is **paid from generated revenue**, not from this R2M capital allocation.
- Monthly churn assumption: **<2%** per month, consistent with B2B SaaS industry benchmarks for SA mid-market.
- Customer Lifetime Value assumes **4-year average retention** — conservative for enterprise ERP.
- Marketing CPC and CPM rates reflect **Google Keyword Planner** and **LinkedIn Campaign Manager** SA data as at April 2026.
- Event stand fees are based on **published exhibitor prospectus pricing** for 2026 where available, or 2025 pricing +6% CPI escalation.
- Contingency reserve (12.5%) is deliberately held unallocated, to be deployed based on mid-year performance review.
